Windows

Get the version of pygame for your version of python. You may need to uninstall old versions of pygame first.

NOTE: if you had pygame 1.7.1 installed already, please uninstall it first. Either using the uninstall feature - or remove the files:

c:\python25\lib\site-packages\pygame . We changed the type of installer, and there will be issues if you don't uninstall pygame 1.7.1 first (and all old versions).
