Hiring programmers made easy

The on demand programmer testing solution
that matches your job descriptions

TRY OUR RECRUITING PLATFORM

but I'm a programmer!
Take our free lessons & challenges

Your company's testing solution

Hire faster

Filter out candidates who don't meet your standards without involving your technical colleagues.

Hiring made simple

Codility makes testing programmers a breeze, even for recruiters without a technical background.

Hire smarter

Codility gives you objective insights into your candidates programming skills, showing you their thinking process before you interview them.

Start right now

Codility works right out of the box. No long setups. Programming tasks are ready to be used.

The Codility Hiring Philosophy

Watch Greg, our CEO, talking about how testing **fundamental programming skills** allows you to hire faster and smarter.

How online testing works

1.

Invite your candidates to our automated test

2.

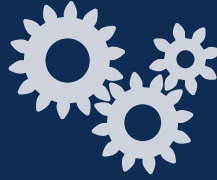

Get your candidates graded online based on their actual skills

3.

Enjoy interviewing only the best

Get an in depth view of how it works

Hear what others think

// When I first looked at Codility I thought that it was an interesting idea... now I wouldn't consider employing without it. I even think we will use it before every salary review. //

**James
Stokes.
CEO.
CoachingCloud.**

// Codility enables us to reach out to a much larger number of candidates, all the while requiring less of our recruiters' time. 100% of the candidates who come for a final interview onsite are outstanding! We're thrilled and highly recommend Codility! //

**Dr. Mauricio
Carneiro.
Group Lead.
Broad
Institute of
MIT and
Harvard.**

Codility for programmers

Help me with my test

If you have received an invitation to a Codility test, go ahead and open it now. **You don't have to start the test at once**, but the information you find there will help you prepare.

Our FAQ explains what kind of code you will have to write, how your solutions will be evaluated and talks in detail about the testing procedure.

I want to train

Codility has **free training**, lessons and challenges for the programming community.

There are **16 lessons** with around **70 training tasks**. When you complete a task you will get feedback on its correctness and performance.

We also run programming **challenges** to allow programmers to show off their skills.
