INFOGRAPHIC: Experience the Internet of Things

SHARE

Que the kitschy, futuristic music: The smart home is well on its way to becoming an everyday reality! For decades, we've conjured images of a home that likens to the Jetsons. What's different now?

The AllSeen Alliance just announced a growing list of AllJoyn Certified products that let you know your apps, devices, and services seamlessly work together now and into the future.

To help you visualize what this connected lifestyle looks like today, our new infographic "[Experience the Internet of Things](#)" illustrates how the future of IoT will change the way you live. The possibilities are endless.

Experience The Internet of Things

Experts predict that by 2020 there will be more than 26 billion* connected devices, applications and other products, giving you new ways to improve and control your life. How will this change the way you live? The possibilities are virtually endless. Here is a connected lifestyle example:

The Internet of Things Helps Get Your Morning Started

10 minutes before it's time to wake up, your thermostat begins to warm things up.

Your smart lights gradually brighten and soft music turns on.

Your coffee pot turns on as does your favorite morning news program.

The Internet of Things Eases the

The Internet of Things Eases the Transition from Work to Home

After leaving work, your connected car signals the cloud that you're nearly home.

Your lights activate, the TV turns on, and the oven pre-heats for dinner.

Your porch lights turn on to welcome you home.

The Internet of Things Helps Keep Your Home Safe

The doorbell rings, automatically turning on a security camera on the porch.

Camera footage is sent to the television and your phone so you can see who's there.

You choose whether or not to remotely open the door.

AllJoyn® Lets You Customize and Control Connected Devices

- 1** Devices seamlessly and securely discover, connect and interact with each other.
- 2** You choose the devices and services to connect to your network.
- 3** Use your phone, tablet, or smart TV to manage alerts, devices, and services.

What can an
AllJoyn Certified product
Do For You?

There's no doubt the Internet of Things will change the way we live in dramatic and exciting ways. With AllJoyn Certified products you know your apps, devices and services will work seamlessly together now and in the future—simply, securely and hassle-free. When you look for the AllJoyn Certified logo on the products you buy, the possibilities are virtually endless. AllJoyn is maintained by the AllSeen Alliance, the world's largest project for the Internet of Things. 180+ companies are creating connected experiences for you including the following brands:

Alcatel A.S.

All AllJoyn products use the same underlying technology to ensure they will work with other AllJoyn devices—even ones from different manufacturers. This approach of one common AllJoyn framework removes headaches for developers and confusion for consumers. Products actually working, connecting and interacting with each other the way they're supposed to? That's true luxury living.

"Having a house full of locks, lights, appliances and thermostats that can communicate with each other and the cloud is critical to getting value from those purchases. [...] Unless all the pieces come from the same company, they need a shared, cross-vendor language for finding and understanding each other. AllSeen is offering its AllJoyn framework to fill that need,"

reports Stephen Lawson of [PC World](#) .

The Alliance thoroughly tests for and verifies software compliance and product interoperability. Look for products with the [AllJoyn Certified](#)  stamp of approval and you'll enjoy the plug-and-play peace of mind you deserve with all your connected apps, services and devices.

Join the conversation via the hashtag [#AllJoyn](#)  and let us know what excites you the most about connected living at home, work or on the road.

The countdown to [#CES2016](#)  begins! Will we see you there? [#AllJoynCES](#)
