network security

Regular readers know we like silver linings here at Naked Security. We even managed to find one amongst the detritus of the recent Ashley Madison data breach. → If you missed that breach: a hacking crew calling itself Impact Team got into the back-end of an online "adultery dating" service called ...

US cop goes wardriving to sniff out stolen gadgets by MAC address (<https://nakedsecurity.sophos.com/2015/09/10/us-cop-goes-wardriving-to-sniff-out-stolen-gadgets-by-mac-address/>)

nakedsecurity.sophos.com - 20 hours ago

When it comes to sniffing out unsecure Wi-Fi networks, you can take your pick of vehicle to drive around: we've had warbiking, feline warprowl (with bonus mouse catching!), and warstrolling (with high heels packing Wi-Fi hacking tools, no less!). Now, a US cop has reverted to the plain old vanil...

PIN-changing, screen-locking Android ransomware (http://www.net-security.org/malware_news.php?id=3097)

net-security.org - 17 hours ago

ATTENDANCE OF THE FORBIDDEN PORNOGRAPHIC SITES HAS BEEN FIXED. FOR THIS REASON YOUR DEVICE HAS BEEN LOCKED.

INFORMATION ON YOUR LOCATION AND SNAPSHOTS CONTAINING YOUR FACE HAVE BEEN UPLOADED ON THE FBI CYBER CRIME DEPARTMENT'S DATACENTER.

FIRST OF ALL, FAMILIARISE WITH THE POSITIONS STATED IN SECTION *"THE LEGAL BASIS OF VIOLATIONS"*. ACCORDING TO THESE POSITIONS YOUR ACTIONS BEAR CRIMINAL CHARACTER, AND YOU ARE A CRIMINAL SUBJECT. THE PENALTY AS A BASE MEASURE OF PUNISHMENT ON YOU

A sophisticated new piece of ransomware targeting Android users and locking them out of their devices by changing the PIN has been discovered by ESET researchers. Masquerading as an app for viewing adult videos called "Porn Droid", the LockerPin Trojan lurks on third party markets, warez forums and ...

Apple iMessage's end-to-end encryption stymies US data request

(<https://nakedsecurity.sophos.com/2015/09/10/apple-imessages-end-to-end-encryption-stymies-us-data-request/>)

nakedsecurity.sophos.com - 20 hours ago

The law enforcement community has been warning technology companies that encryption in their products could let criminals and terrorists off the hook, with little evidence to support that claim. It turns out those warnings - from top law enforcers like FBI Director James Comey and former US Attorne...

Encryptr: Open source cloud-based password manager Review (<http://www.net-security.org/review.php?id=350>)

net-security.org - 21 hours ago

Encryptr is based on the Crypton JavaScript framework. The whole idea behind the Crypton concept is to enable developers to store data on the remote server in such way that the server doesn't know what that data is. All Crypton-based applications are built solely on the client, so the server is used...

Bedroom pirate gets 4 years for running a £300K streaming site

(<https://nakedsecurity.sophos.com/2015/09/10/bedroom-pirate-gets-4-years-for-running-a-300k-streaming-site/>)

nakedsecurity.sophos.com - 19 hours ago

A Northern Ireland man has been handed a four-year jail term for running a series of very lucrative piracy streaming websites - including BedroomMedia.com and FastPassTV - from his bedroom, in Carnhill, Derry. According to the Derry Journal, "social recluse" Paul Mahoney, admitted to being responsi...

Attack code for critical Android Stagefright flaw published (<http://www.net-security.org/secworld.php?id=18839>)

net-security.org - 21 hours ago

HELP NET SECURITY

After having graciously waited for quite a while to publish the exploit for the Android Stagefright vulnerability (CVE-2015-1538) so that Google, mobile carriers and device manufacturers might push out a patch and protect users, Zimperium researchers have released the code on Wednesday. The company ...

Aggressive tactics from DD4BC extortionist group revealed (<http://www.net-security.org/secworld.php?id=18838>)

net-security.org - a day ago

Akamai shared details of an increase in DDoS attacks from the Bitcoin extortionist group DD4BC, based on observation of attack traffic targeted at customers from September 2014 through August 2015. Since April 2015, they identified 114 DD4BC attacks, including more aggressive measures that target br...
