According to the Government of Seoul, the North Korea is the main suspect for a cyber attack that last year hit the South Korean capital's subway system.

The attack, staged between March and August 2014, affected several servers of Seoul Metro, which

runs four major subway lines,

According to the ruling party legislator Ha Tae-Kyung the North Korea is responsible of a cyber attack on the subway system in Seoul. Intelligence reports revealed that the cyber attack has been carried out last year between March and August 2014 and affected a number of servers of South Korean capital 's Metro. The Seoul's subway lines are among the most crowded in the world, is has been estimated that it carries around 5.25 million passengers a day.

Ha Tae-Kyung revealed that nearly 60 employee computers were infected by malware, the expert at the National Intelligence Service (NIS) that analyzed the malicious code have found many similarities to those North Korean hackers have used in precedent attacks.
