Our Story

Lily started in September 2013 in the basement of a UC Berkeley robotics lab, where Henry and Antoine built the first prototype using a Raspberry Pi and an Arduino.

In Spring of 2014, leading investors Shana Fisher and SV Angel supported the Lily vision and showed them the yellow brick road. Along the way, Robb gave Lily a heart, Rowland gave Lily courage, and Nghia gave Lily a brain.

Our mission is to release human creativity by inventing tools that allow for effortless expression. We believe that great products are built with a clear purpose.

Our Team

Vahram Antonyan

Prototyping

Matt Aralis

Engineering

Antoine Balaresque

CEO, Co-Founder

Brad Bowery

Operations

Henry Bradlow

CTO, Co-Founder

Devyn Byrnes

Engineering

Ying Chen

Prototyping

Kelly Coyne
