WHAT'S HOT

Short Bytes: In the past,
Pakistani and India cyber
hackers have been targeting
each other by hacking
different government
websites. In the latest
development, India-based
hacking agencies have
defaced some government
and defense websites of
Pakistan.

n the recent hacking attacks by the India-based hacking agencies, some government and defense websites of Pakistan have been attacked. The two hacking groups named VVV and Shakti Campaign carried out these attacks, according to an international cybersecurity expert.

These attacks include

Anonymous Announces Revenge Campaign For Paris Attacks By ISIS #OpParis

15 NOV, 2015

Learn For Free: Google's 2nd Version Of Android App Development Guide one on the Pakistan's defense website and the reports indicate that the attacks were in the form of spear fishing. It should be noted that the hacker group Shakti was shut down in 2010 and it became operational again last year.

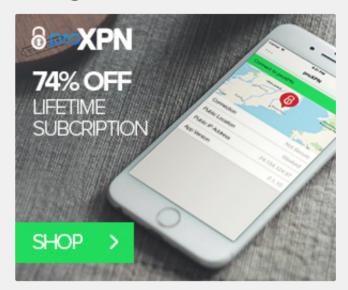

Shakti and VVV
operate via different
means and tactics –
VVV sends links to
interesting mobile
applications, while
Shakti usually sends
news articles with
provocative headlines
to the target.

"We have done research into these attacks and it was

found that in some cases the websites of some news agencies were spoofed to attract clicks," said

Kurt Baumgartner, fossBytes Newsletter principal security researcher at the Kaspersky Lab.

Kurt says that the nations that were attacked have complained to India. The principle cause of this attack appears to steal information, according to the experts. It should be noted that India has become more

aggressive in the cyberspace since last year.

"Like recently they defaced a government website of Chhattisgarh government, only to realise that four Pakistani websites hoisted Indian flags," a person with the knowledge of the incident told ET.

In the past, Pakistani and India cyber hackers have been targeting each other by hacking different websites, and this appears to be just another addition to the same.
