Let's Encrypt is Trusted

We're pleased to announce that we've received cross-signatures from IdenTrust, which means that our certificates are now trusted by all major browsers. This is a significant milestone since it means that visitors to websites using Let's Encrypt certificates can enjoy a secure browsing experience with no special configuration required.

Let's Encrypt Community Support

Let's Encrypt's success depends on the support of a strong community. Nowhere is this more true than when it comes to subscriber support. Today we're happy to announce Let's Encrypt Community Support, a place for our community to both give and receive support.

Updated Let's Encrypt Launch Schedule

We can't wait to see websites turn on TLS with Let's Encrypt. Trust is our most important asset, however, and we need to take the necessary time to make sure our systems are secure and stable.

ISRG Legal Transparency Report, January 2015 - June 2015

The trust of our users is ISRG's most critical asset. Transparency regarding legal requests is an important part of making sure our users can trust us, and to that end we will be publishing reports twice annually.

Let's Encrypt: Delivering SSL/TLS Everywhere

Vital personal and business information flows over the Internet more frequently than ever, and we don't always know when it's happening. It's clear at this point that encrypting is something all of us should be doing. Then why don't we use TLS (the

successor to SSL) everywhere? Every browser in every device supports it. Every server in every data center supports it. Why don't we just flip the switch?
