Crossover是一款由Codewaver公司开发推出的类虚拟机软件，能让Linux和Mac OS X操作系统和window系统兼容。例如它为Windows软件提供所需的资源，以达到在Mac OS X系统上运行Windows程序的目的。

Crossover不像Parallels Desktop或VMware Fusion，它能够直接在Mac上运行Windows的软件游戏，而不需虚拟机。

在兼容程序目录中，不仅有Microsoft Office、AutoCAD、Windows Media Player 9、Adobe Photoshop、Dreamweaver MX、Internet Explorer等知名软件，还有《半条命2》、《使命召唤》、《反恐精英》、《传送门》等3D游戏。

插入程序CD/DVD或从其它设备中选择文件并安装。此外，你可以选择执行Run Command功能，在不安装程序的情况下运行该程序。

另外，Wine是CrossOvers所使用的引擎，它是一个在UNIX系统中执行Windows APIs的开源工具。

CrossOver runs thousands of different Windows programs on Mac. From productivity, utility, games, and design software-Windows software never looked better when launched right from the Mac dock with CrossOver Mac. Easily switch between Mac and Windows programs without rebooting, without using a virtual machine and without purchasing a Windows license. Windows programs gain native Mac functionality like copy & paste, keyboard shortcuts, and Mission Control.

El Capitan compatible CrossOver Mac 15 is the easiest way to run Microsoft Windows s oftware on your Mac without buying a Windows license, rebooting, or using a virtual ma chine. CrossOver Mac makes it easy to launch Windows programs natively from the doc k. CrossOver also integrates Mac OS functionality, like cross-platform copy & paste, and shared file systems for your Windows applications.

CrossOver Mac runs Windows games, productivity software, and utility programs all in o ne application. And without the overhead of a virtual machine, programs and games can run as fast or faster than they would under a Windows operating system.

Run Windows Software Without Rebooting

Once CrossOver is installed, install and launch your Windows programs as you would an y Mac application. You get access to your favorite Windows programs with ease. No bo oting required, or launching a virtual machine. No having to copy files from one file syste m to another. CrossOver runs directly on your Mac, and so does your Windows softwar e.

One Click Installation

Our CrossTie technology is a major step forward for CrossOver users, because it makes installing Windows applications drop-dead simple. Just clicking the "Install" button in Cr ossOver tells CrossOver to take care of the rest. You can do the same thing from our ma ssive Compatibility Center, which has thousands of applications with CrossTie installers. Relax, and let CrossOver do the work.

Software Runs at Native Speed

CrossOver runs natively on your Mac. Which means you don't have to run a copy of Win dows. Which means you're not paying the RAM and CPU penalty for two operating syst ems running at the same time. Which means no bogged down, choppy performance. If y ou need native speed, CrossOver is the better choice.

Seamlessly Integrates with Your Desktop Environment

Since CrossOver is running on your native Mac file system, there's no need to move files back and forth between a Windows partition and OS X. Everything's in one place, right where you need it. Seamlessly Cut & Paste between Windows documents and Mac doc uments. Launch your Windows programs from the dock. Your Windows programs beha ve like native Mac applications.

Bottles

Bottles are a unique feature of CrossOver that allow separate Windows environments (X P, Win7, etc.) to be packaged and self-contained with your favorite programs. Bottles ar e really useful, because they let you easily backup your software, and move it from mac

hine to machine. They also ensure that you get the right version of Windows for your ap plication's needs. It's like having several different Windows machines operating together on your computer.

What's New Version 15.0:

Note: Now requires OS X 10.8 or later.

- The User Interface of CrossOver's Software Installer has been redone. Installing applic ations with CrossOver is simpler than ever before.

- CrossOver now includes a High Resolution Mode to allow compatible Windows applic ations to take full advantage of Macs with Retina displays.

- Quicken 2016 now runs in CrossOver.

- Wine 1.8 brings thousands of updates to CrossOver's core compatibility with Windows applications.

- Dual screen Linux setups will run Microsoft Office better than before.

System Requirements: Mac OS X 10.8 or later
